### **ELANTI SYSTEMS SECURES ONGOING COMMITMENT FROM NEW VENTURE PARTNERS AND INNOVATION CAPITAL**

**Princeton, N.J. (May 20, 2008)** – Elanti Systems, Inc. today announced the completion of a \$4.5 million financing round. Elanti Systems has secured the exclusive follow-on commitment from its existing investors; New Venture Partners and Innovation Capital. Elanti Systems is a leading innovator of intelligent routing and customer service visualization software solutions for the global telecommunications industry.

“Elanti Systems’ unique and innovative technology enables profitable and high-quality delivery of next generation services. Our breakthrough IP MPLS control plane delivers real time IP traffic optimization, leading to unparalleled economic benefits for our service provider customers. We’re getting tremendous feedback from carriers and partners around the world. It is a very exciting time for Elanti Systems; a time of substantial growth. We are rapidly expanding our company operations in the US, EMEA and Asia Pacific. We are thrilled that New Venture partners and Innovation Capital have whole-heartedly supported our vision and growth plans.” said Michael Jaschke, CEO at Elanti Systems.

Daniel Deeney, Partner at New Venture Partners stated, “Elanti Systems has the potential to transform the way IP networks are managed and how services between carriers and end customers are visualized. The company’s dynamic optimization and service management products offer operators a compelling solution to managing next generation networks.”

Roger Price, partner at Innovation Capital said, “Elanti Systems is a terrific investment opportunity and a very exciting company. It has an exceptional management team and disruptive technology that telecommunication service providers desperately need. It is due to Elanti’s substantial market opportunity and game changing technology that we wanted to ensure their success through supporting their rapid growth.”

Elanti Systems offers service providers real time solutions that globally optimize and balance IP Network traffic in response to unexpected network events saving millions in capital and operational expenditure, while ensuring quality of service for end customers. Elanti Systems also delivers competitive advantage by helping service providers truly focus on, and exceed

their customers' needs and expectations through service visualization and interactive test capabilities for IP services customers.

The investment from New Venture Partners and Innovation Capital will enable Elanti to continue with its aggressive product development and market strategy.
